7. Conclusion

The calculated analysis produced an average driver score of 88.11/100. Rahul is the best-performing driver with an overall score of 100.00/100 and a status of Attentive. Arjun recorded the lowest overall score of 63.43/100 and requires the greatest attention. Morning is the best-performing shift with an average score of 94.48/100, while Night is the lowest-performing shift with an average score of 81.19/100. Among the 5 drivers, 4 are Attentive, 0 are Moderately Attentive, and 1 are Inattentive. The results are generated dynamically from eye closure, blink rate, head pitch and yawning measurements. Therefore, changing these values in the Excel dataset and running the project again will automatically update the scores, statuses, rankings, charts and this conclusion.
